Full Stack Разработчик

Experiența profesională

Full-stack and Front-end developer · AroundWire

Mai 2024 - Prezent · 9 luni

Platform Development: Developed pro.aroundwire.com, a platform with 40+ unique landing pages optimized for performance (70-80+ on mobile PageSpeed Insights). Ensured pixel-perfect designs and quick adjustments to meet project demands.

Admin Panel Optimization: Built a user-friendly admin panel for managing landing pages. Enabled marketers to edit text, adjust colors, and create pages, speeding up production.

Enhanced Blog Features: Designed a blog with animations and delayed publishing for landing pages, boosting user engagement.

Frontend Enhancements for the Marketplace: Optimized marketplace design for consistency, modern aesthetics, and better user experience.

Performance Optimization: Implemented a system to load only essential JavaScript and CSS dependencies per page. Used asynchronous techniques to reduce file sizes and requests, enhancing load times.

Workflow Automation: Streamlined processes, enabling the creation of 5+ landing pages daily.

Collaboration and Innovation: Proposed ideas like regional content personalization and improved registration to attract and retain users.

Current Focus: Advancing JavaScript skills for game logic, animations, and Laravel for basic websites. Exploring 3D object creation and animations.

Testimonial:

"Daniil is a talented and responsible Full-stack developer with deep expertise and excellent personal qualities. He optimized workflows for creating 5+ landing pages daily and provided valuable ideas for the company. Highly recommend him for Frontend, Backend, Full-stack, WordPress, or Laravel roles."

Sergiu Butucea, Team Lead, Development Department, AroundWire
