# Front-End Developer

## Despre mine

Despre mine I am a skilled Front-End developer with over 3 years of experience in crafting responsive and dynamic web applications. My expertise lies in harnessing the power of JavaScript to bring web projects to life, and I'm proficient in using cutting-edge frameworks like React and jQuery, as well as Vanilla Javascript to deliver outstanding user experiences.

In addition to my Front-End skills, I have also ventured into Full-stack development, showcasing my passion for creating digital solutions. I've engineered Back-End applications using Node.js and Express.js along with PHP as well as database management with MySQL and MongoDB. This complements my Front-End proficiency, enabling me to manage entire projects.

I also created WebView apps for Google Play using Android Studio, further demonstrating my versatility in web and mobile application development.

With a proven track record of successful projects and a dedication to staying at the forefront of web development trends, I'm excited to bring my expertise to your team. Let's work together to turn your web development goals into stunning, functional realities.

## Experiența profesională

### Full-Stack Developer · Internet Consulting · Chișinău
*Ianuarie 2021 - Prezent · 3 ani 11 luni*

As a seasoned Full Stack Developer, I specialize in full stack development using React, Express.js, jQuery, and PHP, with extensive experience in MongoDB, MySQL, UI/UX design, Mobile App Development, CMS integration, responsive web design, and API integration.

I've delivered diverse projects, including a feature-rich online Belot card game, where I implemented jQuery and React for the frontend, created custom UI components, and integrated complex animations. Additionally, I developed a full-stack app for generating verifiable random numbers for online card games using React, Express.js, and MongoDB.

In mobile development, I created a utility notification app deployed on Google Play, utilizing React, PHP, and MySQL. I also modernized a weather website, refactoring legacy PHP code and implementing responsive design.

My work includes government websites for Moldova, such as a Consumer Protection Site and Cultural Goods Registry, where I

- MySQL
- MongoDB

## Permis de conducere

Categoria: B
Cu automobil personal

managed frontend development, CMS integration, and backend connectivity. I led the development of an e-learning platform, enhancing CMS functionality and backend systems.

I've also contributed to various corporate and news websites, including a React-based company site with a custom CMS, as well as refactoring a national news portal for responsiveness.

Competențe: Full Stack Development
