About me

Experienced QA Automation Engineer with a strong background in software testing and automation. Proficient in Java programming and skilled in developing and executing automated tests for web-based applications. Familiar with XML, Web APIs, CSS Selectors, and JSON for effective testing and data handling. Adept at utilizing a variety of testing tools and frameworks, including Selenium, TestNG, JUnit, Swagger, Postman and Appium. Passionate about staying updated on emerging web technologies and committed to delivering high-quality solutions.

Work experience

QA Engineer · VEC DEVELOPMENT

March 2021 - Present · 3 years 8 months

In my current role as a QA automation engineer, I utilize Java, Selenium, Postman, Swagger, OWASP UI, Appium, and BrowserStack to ensure the quality and reliability of our software products. With Java as the primary language, I develop robust automation scripts for web application testing using Selenium WebDriver. Postman and Swagger are integral tools for API testing, allowing me to validate endpoints and ensure seamless communication between components.

For security testing, I leverage OWASP UI to identify and address potential vulnerabilities in our applications, ensuring they meet industry security standards. Additionally, I utilize Appium for mobile automation, enabling comprehensive testing across different devices and platforms. BrowserStack enhances our testing capabilities by providing a wide range of real device and browser combinations for automated testing, ensuring compatibility and optimal user experience across various environments.

Skills: Java (Programming Language), Selenium, TestNG, Junit, Appium, Swagger, Postman, XPath

INTERNSHIP QA AUTOMATION ENGINEER · Allied Testing

October 2020 - February 2021 · 5 months

During my QA automation internship, I developed expertise in utilizing Java as the primary programming language for automation tasks. Leveraging Selenium, I created robust automation scripts to test web applications, ensuring their

functionality and user experience. TestNG was instrumental in organizing and executing these tests efficiently, allowing for comprehensive test coverage.

Additionally, I gained proficiency in performance testing using JMeter and LoadRunner, where I designed and executed load, stress, and performance tests to evaluate system behavior under various conditions. This involved simulating thousands of users accessing the application simultaneously to identify performance bottlenecks and areas for optimization.

Overall, my internship experience equipped me with a diverse skill set in automation testing, enabling me to contribute effectively to quality assurance processes and enhance the reliability of software products.

Skills: Java (Programming Language), TestNG, Junit, Apache JMeter, HP Loadrunner, Selenium, Swagger, Postman, XPath

CORPORATE LAWYER · Credit Comod

March 2016 - August 2019 · 3 years 6 months

- representing the company in the courts
- debt collection

Skills: Representing the company in the courts

TELECOMS TECHNICIAN · Moldtelecom

November 2013 - September 2015 · 1 year 11 months
